COVID-19 Testing Dataset Codebook

Source: This data set is from Amrom E. Obstfeld, who de-identified data on COVID-19 testing during 2020 at CHOP (Children's Hospital of Pennsylvania).

This data set contains data concerning testing for SARS-CoV2 via PCR as well as associated metadata. The data has been anonymized, time-shifted, and permuted

Codebook

variable	position	Variable Label	units	Codes
subject_id	1	Subject ID		
fake_first_name	2	Pseudo First Name		
fake_last_name	3	Pseudo Last Name		
gender	4	Gender (Anonymized)		
pan_day	5	Day after start of pandemic in which specimen was collected (Anonymized)	Day	
test_id	6	Test that was performed		
clinic_name	7	Clinic or ward where the specimen was collected		
result	8	Result of the test		
demo_group	9	Type of subject		
age	10	Age of subject at time of specimen collection (Anonymized)	Years	
drive_thru_ind	11	Whether the specimen was collected via a drive-thru site		1: Collected at drive-thru site; 0: Not collected at drive-thru site
ct_result	12	Cycle at which threshold reached during PCR		
orderset	13	Whether and order set was used for test order		1: Collected via orderset; 0: Not collected via orderset
payor_group	14	Payor associate with order		
patient_class	15	Disposition of subject at time of collection		
col_rec_tat	16	Time elapsed between collect time and receive time	Hours	
rec_ver_tat	17	Time elapsed between receive time and verification time	Hours
